AWARDED VENDOR

COMPANY OVERVIEW

Elevated Solutions Team (EST) is a Texas-based mechanical contractor supporting public infrastructure, industrial facilities, and water and wastewater construction. Building on established partnerships with Undisclosed Prime Contractors, EST provides specification-based material procurement, supervised process piping and equipment installation, and qualified specialty support for treatment plants, pump stations, and municipal infrastructure. Delivery options include material supply only or material supply with supervised mechanical installation and qualified specialty support.

Selected Mechanical Project Experience

Undisclosed Public Sector Facility — Boiler Plant End of Life Replacement

Replacement of multiple commercial boilers with associated large-bore piping, valves, venting, drainage, equipment connections, and testing support.

Undisclosed Public Sector Facility — Chiller Replacement & Temporary Cooling

Replacement of commercial air-cooled chillers with associated chilled-water piping, pumps, valves, insulation, temporary cooling and startup support.

Undisclosed Public Sector Facility— EMS / Controls & Pump Renewal

Mechanical pump and accessory replacement coordinated with BAS/EMS integration, equipment interfaces, and specialty subcontractors.

DELIVERY MODELS

SUPPLY ONLY — Specified piping, valves, fittings, fabricated spools, equipment, material submittals, procurement, and coordinated delivery.

SUPPLY + INSTALLATION — Furnished materials combined with supervised mechanical construction, equipment installation, testing, specialty-trade coordination, and startup support.

MATERIAL SUPPLY & PROCUREMENT

- **Process Pipe & Valves:** Carbon-steel, stainless-steel, PVC, CPVC, and HDPE piping; fittings, flanges, isolation and specialty valves, and bolts, nuts, and gaskets (BNG).
- **Fabricated Piping & Supports:** Steel pipe spools, coordinated HDPE spool fabrication, non-engineered pipe supports, hangers, restraints, strainers, and mechanical accessories.
- **Mechanical & Treatment Equipment:** Pumps, packaged mechanical systems, compressed-air equipment, cooling towers, HVAC equipment, and related components.
- **Specialty Materials:** Heat-tracing products, mechanical insulation, automated isolation valves, ductwork, and associated installation materials.
- **Material Supply:** Specification-based pipe, fittings, valves, supports, mechanical equipment and related installation materials.

MECHANICAL CONSTRUCTION & INSTALLATION

- **Process Piping:** Large-bore carbon-steel and stainless-steel piping, fabricated assemblies, fittings, valves, supports and equipment connections.
- **Pumps & Equipment:** Pump and packaged-equipment installation with associated mechanical connections.
- **Waterworks Interfaces:** Aboveground and yard piping specified plastic piping systems and related waterworks interfaces.
- **Specialty Execution:** Qualified specialty support for HDPE, insulation, heat tracing, rigging and controls where required.
- **Testing & Turnover:** Project-required testing, startup support, commissioning coordination and turnover documentation.

CREDENTIALS

- Texas HVAC Contractor - TACLA124593C
- OSHA 30 supervisors / OSHA 10 crews
- SBE Certified, DFW MSDC
- Project-Specific Bonding Available
